

# Genetic Insights at Unparalleled Depth

Serenity can see deeper and with more precision into your genetic health. We use clinical-grade genetic testing across 447 genes and our AI-driven intelligence system examines over 2 million gene variants.

## Clinical-Grade Testing For:

### HEART DISEASE

122 Genes

- Cardiomyopathy
- Arrhythmia
- Hereditary Cholesterol Disorders
- Hypertension
- Blood Clotting / Vascular Disorders

### INHERITED CANCERS

86 Genes

- Hereditary Breast Cancer
- Hereditary Ovarian Cancer
- Lynch Syndrome
- Risks for Brain, Renal, Hematologic, Uterine, Pancreatic, Prostate and Thyroid Cancers

### ADVERSE DRUG INTERACTIONS

80 Genes

- Likelihood of response and risk for adverse reaction to hundreds of the most commonly prescribed drugs

### HEARING LOSS

15 Genes

- Age-Related Hearing Loss
- Congenital Nonsyndromic Hearing Loss
- Noise Induced Hearing Loss

### INFERTILITY

Female: 33 Genes

Male: 18 Genes

- Low and Absent Sperm Count Disorders
- Premature Ovarian Failure Disorders
- PCOS

### VISION LOSS

19 Genes

- Early Onset Glaucoma
- Early Onset Macular Degeneration

### METABOLIC DISORDERS

14 Genes

- Hemochromatosis
- Risk of Adverse Response to Anesthesia

### CARRIER SCREENING

20 Genes

- Autosomal Recessive Diseases
- X-linked Diseases

### WELLNESS

49 Genes

- Diet/Nutrition
- Sleep
- Fitness/Exercise

### NEURODEGENERATIVE DISEASES

41 Genes

- Alzheimer's Disease
- Parkinson's Disease
- Amyotrophic Lateral Sclerosis
